

Bikini Atoll, Republic of the Marshall Islands

General Destination & Trip Information

- **Arrival/Departure airport:** Kwajalein Airport (KWA)
- **Embarkation/Disembarkation:** Ebeye Island

Flights

Advice on International Flights

Master Liveboards' Bikini Atoll itineraries are scheduled around United Airlines 'Island Hopper' flights from Hawaii to Kwajalein via Majuro. The HNL-MAJ-KWA route departs from Honolulu early in the morning on Monday, Wednesday and Friday, and takes around 7 hours to reach Kwajalein. Bear in mind that you will be crossing the international date line when travelling West from Hawaii to the Marshall Islands so you will arrive the day after departure from Honolulu, i.e. Tuesday, Thursday or Saturday.

Generally, you will need to leave from Los Angeles (LAX) or San Francisco (SFO) the day before (Sunday, Tuesday, Thursday) and ideally you will arrive in Honolulu one day before your flight to Kwajalein to ensure that you make the connection.

PLEASE NOTE: There have been many instances of luggage not arriving in Kwajalein on the same flight as guests due to aircraft weight limitations. As the flights only operate every other day, for guests arriving from Hawaii on the day of embarkation this means their missing luggage *usually arrives two days later, after the liveboard has departed* Ebeye and is on its way to Bikini Atoll.

United Airlines also operates a flight from Guam via Chuuk and Pohnpei on alternate days to the flights from Honolulu, i.e. Monday, Wednesday and Friday, although the same issues with luggage can occur on that route too.

IMPORTANT: We strongly recommend making arrangements to arrive at least 2 days before your liveboard embarkation date to make allowances for luggage arriving on a later flight.

Please be aware that there are no hotels on Kwajalein, and only one in Ebeye. Reservations can be made in advance by contacting the hotel directly by email, but do not accept credit cards or bank transfers so payment needs to be made in cash when you check in.

Visas and Passports

US citizens do not require a visa to enter the Marshall Islands. Visitors from the EU, UK, and Taiwan are exempt from visa requirements for stays up to 90 days. Most other nationalities will be granted a visa on arrival for a fee of \$100.

Please refer to www.rmiocit.org/visa-requirements for further details of countries covered by visa exemption agreements or eligible for visa on arrival.

Nationalities not covered by visa waiver agreements, or eligible for a visa on arrival, must obtain a visa before travelling to the Marshall Islands. Processing time for visa applications is up to 14 days.

Passports must be valid for 6 months beyond the date of departure from the Marshall Islands.

Guests travelling with medication should bring a copy of their physician's prescription with them.

ESTA

Non-US citizens need a US Visa or ESTA (Electronic System of Travel Authorization) to travel via the United States and Hawaii or Guam. An ESTA, or US visa, must be obtained before travel. Guests without either of these may be denied boarding of their flight.

Citizens of 37 countries, including most European nations, the UK, Australia, New Zealand and Japan are eligible for the ESTA under the visa waiver program and should apply online at least 72 hours before travel.

Please refer to the US Department of Homeland Security's ESTA information page for further details and application: esta.cbp.dhs.gov/

Arriving at Kwajalein Airport

As it is a US Military base, there are special procedures for entering Kwajalein. Please ensure you have a printed copy of the **Master Liveboards Sponsor Letter** on hand when arriving in Kwajalein as it is a declaration of why you are travelling to/through Kwajalein.

Important information on arrival procedures is provided in our [Kwajalein Arrival Procedure](#) document which can also be downloaded from the downloads page of the Master Liveboards website (www.masterliveboards.com/forms). A shuttle bus will take you from the airport to the ferry terminal where an Army ferry departs on a short trip to Ebeye Island.

Airport Tax

All passengers travelling out of the Marshall Islands are charged \$20 USD departure tax, which needs to be paid in cash at the airport.

Insurance

Insurance which covers scuba diving is mandatory.

Your insurance must cover technical diving activities, and provide full cover for recompression chamber treatment, emergency air evacuation and any additional medical expenses. We strongly recommend purchasing diving-specific insurance which covers depths beyond recreational limits and any diving-related eventuality.

All guests are also required to carry full travel and cancellation insurance, as outlined under section 3 of our [Terms and Conditions](#).

IMPORTANT: We cannot be held liable for delays occurring during the cruise, curtailment due to circumstances beyond our control, lost or missing dive equipment or other luggage, nor for any delays or cancellations of flights, accommodations and transfers that we organise on your behalf.

For further details of why travel insurance is a crucial part of your holiday arrangements, take a look at our blog - '[Do You Really Need Travel Insurance?](#)'

Master Liveboards act as a referrer for DiveAssure who offer dive and travel insurance including short-term and multiple-trip policies. Their comprehensive 'Dive & Travel Plus' plan has been specifically developed for diving liveboard holidays and covers expenses in the event of missing your liveboard departure due to flight delays or missed connections, and also provides cover for lost diving days if for any reason the boat is required to abort the cruise; for instance, due to a guest injury, mechanical breakdown of the ship, air supply failure, inclement weather conditions, etc.

Please consult our webpage for details and a direct link to DiveAssure's booking portal: www.masterliveboards.com/insurance.

Diving Information

Diving in Bikini Atoll is only suitable for divers with technical diving certifications and deep, wreck diving experience.

The **average maximum dive depth** of the wrecks in Bikini Atoll is **50 metres**. Therefore, Bikini itineraries are **NOT SUITABLE FOR RECREATIONAL DIVERS**.

Mandatory minimum certification and experience requirements

Open Circuit divers are required to have certification for depths of at least 45 metres, i.e. **TDI Advanced Nitrox and Decompression Procedures, or equivalent, e.g. PADI Tec. 45, with 100 logged dives and wreck diving experience.**

Closed Circuit Rebreather divers must have minimum **TDI CCR Air Diluent Decompression and Helitrox 45 metres certification** or equivalent with 100 logged dives and wreck diving experience.

Any guests who do not meet the minimum mandatory certification and experience requirements will not be able to dive.

To get the most out of your dives in Bikini Atoll, we recommend certification to depths beyond the 45 metre limit of the mandatory ones indicated above, for example:

- TDI – Extended Range Diver (55 metres)
- IANTD – Technical Diver (51 metres)
- CMAS – Extended Range Nitrox Diver (54 metres)
- ANDI – Technical SafeAir + Extended Range Diver (ERD Lvl 4) - max. depth 50 metres

We are not able to offer any certification courses on Bikini Atoll itineraries.

All guests need to provide copies of their certification card(s) as part of their pre-embarkation [API](#) and may be asked to show them, and a record of their logged dives upon embarkation as proof that they meet the mandatory qualifications and experience.

All divers are required to dive in buddy teams and are responsible for planning their own dive profiles.

Solo diving is NOT permitted in any circumstances.

Due to the remote nature of diving in Bikini Atoll, we recommend that all divers plan and execute conservative dive profiles and, once all the necessary decompression obligations are met, spend an additional 10 minutes between 3-6 metres before surfacing.

Water Temperature and Exposure Suits

The water temperature in Bikini is pretty consistent with very little variation from the norm of 28°-29°C (82°-84°F). However, a drysuit or full-length wetsuit is strongly recommended due to the nature of the dives. We advise bringing appropriate thermal exposure protection for extended dive times and prolonged deco-stops.

Deco / Tec Diving Facilities

For convenience, there is a “Deco Bar” under the dive platform of the main vessel with hang bars at 6 and 3 metres and an additional line to 21 metres to assist divers in their staged decompression stops. Stage tanks are available to rent and gases are charged per litre of Oxygen / per fill.

Oxygen

Oxygen on board comes from an Oxygen Generator, which does not produce 100% pure O², but up to 93% purity, +/- 3%.

Helium

Helium is available for rebreather divers and Open Circuit Trimix divers. However, due to the logistics of obtaining and storing helium, it must be pre-ordered by completing the [technical diving form](#) no less than 6 months before departure.

Oxygen and Helium requirements must be submitted as early as possible but paid for on board, and are charged per litre, per fill. We do not bank non-standard gases, so all gases supplied will be charged in full, even if they are not fully used.

Rebreather Diving

Pacific Master is equipped with booster pumps to support rebreather divers and has bailout cylinders available to rent. We can facilitate the supply of CO² absorbent (Molecular Products 797 Sofnolime) which is available in 20 kg tubs only and charged per tub. Sofnolime MUST be pre-ordered at least 6 months before the liveaboard departure date but needs to be paid for on board.

PLEASE NOTE:

- The majority of our rebreather cylinders have 3/4 NPS valve threads although there are also a limited number with M25 threads.
- **M26 thread/adaptors are NOT available;** Guests who need cylinders with M26 valve threads or M26 adaptors for their rebreather are advised to bring their own.
- We do not carry spare oxygen cells or specialist rebreather tools. Therefore rebreather divers will need to bring their own.
- We are unable to supply pre-packed scrubber cartridges for rebreathers such as Poseidon.

Pre-booking of all rebreather supplies and gases is essential to ensure we have sufficient quantities on board. Please complete the [Pacific Master Technical Diving Form](#) to let us know your requirements as soon as possible.

Gas prices, equipment and cylinder rental costs can be viewed under 'Extras' on the Pacific Master page of our website: www.masterliveaboards.com/boats/pacific-master/

Diving Equipment

Guests are advised to bring their own technical diving equipment. There is a limited amount of rental equipment available on board (pre-booking is required). Weights and weight belts are provided free of charge.

Please inspect and test all of your equipment before travelling. If any of it has recently been serviced we recommend testing it thoroughly before packing for your trip. There are no dive centres or facilities for repairing equipment in Kwajalein, Ebeye or Bikini Atoll.

Required Scuba Equipment

To dive in Bikini Atoll you will need the following items:

- Two methods of buoyancy. This can be achieved by using a wing with a redundant bladder, drysuit or lift bag with a minimum of 20 kg/45lb of positive lift.
- Dive Computer - Multi-gas dive computer capable of switching between a minimum of 2 gases ideally more.
- Backup Computer or depth/bottom timer.
- 2 Surface Marker Buoys - One red or orange and one yellow with a slate or wet notes attached for emergency use.
- 2 Reels or spools - One with a minimum of 15 metres of line and one with a minimum of 60 metres of line.
- Dive Slate or Wet Notes - additional to the slate or wet notes used with the emergency SMB.

- Minimum of **two dive torches*** (primary and backup) for guests planning to do wreck penetration.

*Divers who wish to penetrate overhead environments in Bikini Atoll must bring their own primary lights. All divers must also follow their training standards for overhead diving with respect to backup lights.

Recommended Equipment

- Back-plate, harness and wing - capable of carrying manifolded twin aluminium 80 cu ft cylinders and one or two 40/80 cu ft aluminium stage cylinders. The wing should have a minimum of 20 kg/45lb of positive lift.
- Two DIN regulator sets: one with a long hose configured for twin-cylinder operation.
- One or two DIN stage regulators for use with up to 95% oxygen.
- Protection – 3mm or 5mm full-length wetsuit. Some divers also like to use a hood or helmet and gloves. Water temperature is between 27°-29°C all year round with no thermoclines.
- Spare Mask - Spare mask should be carried on all dives.

As rental equipment, cylinders and gases are subject to availability, please inform us of your requirements at the time of confirming your liveaboard booking by completing the [Technical Diving Form](#).

There are ***no dive lights available to rent*** on Pacific Master so guests are required to bring primary and back-up lights with them.

Diving Safety

Fit to Dive

All divers are responsible for ensuring that they are fit to dive and are required to provide a completed medical statement before their liveaboard departure. ***Guests who are taking medication, or have any medical conditions or symptoms that could be restrictive to diving need to obtain a doctor's evaluation and clearance to dive before travelling.***

There are no facilities in Kwajalein, Ebeye or Bikini Atoll to obtain medical evaluation and approval.

The medical statement is available in English, German, Mandarin and Spanish and can be downloaded from our website at www.masterliveboards.com/forms.

If you are unable to complete the medical statement as directed or provide a current doctor's certificate (less than 12 months old) clearing you to dive, you accept that you will not be able to take part in scuba diving activities during the liveaboard holiday you have booked with us.

Diving Emergencies

Kindly note that ***we do not support 'In Water Recompression'***.

In the event of a diving accident in Bikini Atoll, the trip will be curtailed for the vessel to return to Kwajalein to facilitate evacuation to the nearest available recompression chamber.

The Marshall Islands are an extremely remote diving destination without any readily available hyperbaric facilities. Although there is a chamber on the military base on Kwajalein, special permission is required to use it, which is difficult to obtain, and is also dependent on the availability of the base's chamber operators.

The nearest recompression chambers that are guaranteed to be available are located in Hawaii or Australia and emergency air evacuation is required from Kwajalein or Majuro to one of these countries.

With the above in mind, all guests are required to have diving-specific insurance according to their level of certification which must cover the maximum depths that you plan to dive to, as well as air evacuation and chamber treatment costs. We also strongly recommend insurance which covers missed dives and trip curtailment.

Destination Information

Time Zone: The local time in the Marshall Islands is 12 hours ahead of UTC /GMT.

Money Matters

The local currency in the Marshall Islands is the US Dollar. There are no ATMs in Ebeye so we recommend bringing a sufficient amount of USD in cash, preferably in smaller denominations to cover any incidentals or local purchases.

Health

Medical care in the Marshall Islands is very basic with the 'best' medical facility being in Majuro. Any form of treatment other than basic requires evacuation by air.

Sensible precautions should be taken with food and it is advisable to drink bottled water only. Please make sure you use insect repellent and cover exposed skin to minimise the risk of insect-borne diseases that are present in the Marshall Islands, such as Dengue Fever.

The levels of radioactivity to which divers are exposed from the shipwrecks in Bikini Atoll is negligible since water acts as an excellent insulator. Divers are safe, as long as they do not try to take souvenirs from the wrecks. Pilfering is not only hazardous, it is forbidden.

Vaccinations

We strongly advise all guests ensure that all routine vaccinations are up to date; these include MMR* (measles-mumps-rubella), Tetanus, Diphtheria and Polio.

It is each person's responsibility to check their home country's travel advisories, or with their nearest health care professional or travel clinic for up-to-date vaccination requirements and recommendations for the Marshall Islands.

*Measles Advisory

There have been outbreaks of measles and mumps across the Republic of the Marshall Islands over recent years. Although the RMI Ministry of Health and Human Services has implemented an MMR immunisation program throughout the islands, the situation regarding vaccination

requirements for entry into the RMI is constantly changing. As such, we recommend that all travellers ensure they are immunised against measles and **bring proof of vaccination** with them **in case it is required**. This can be in the form of a vaccination record card (yellow book), or vaccination certificate showing they are fully vaccinated.

Language and Religion

The official languages of the Marshall Islands are English and Marshallese.

Safety and dive briefings on board Pacific Master will be provided in English. If you or any of your group do not speak or fully understand English please let us know before arrival.

Approximately 98% of the population of the Marshall Islands is a mix of predominantly Christian religions: 54.8% United Church of Christ (Protestant), 25.8% Assemblies of God (Pentecostal), 8.4% Roman Catholic and 9% other Christian faiths.

Climate and Weather

The climate of the Marshall Islands is tropical, hot all year round, with constant trade winds and little variation in temperatures, although the central and southern islands are more equatorial and rainy all year round.

Air temperatures in Bikini Atoll average 30°-31°C (86°-88°F) from April to October cooling down to around 25°-26°C (76°-78°F) in the evenings. July to October are the wettest months with an average of 21-22 days and 185-250 mm (7-10 inches) of rain.

Drones

Drone use is allowed in the Marshall Islands but, there are laws that need to be followed:

- Drones must not be flown in sensitive areas including government or military facilities, i.e. Kwajalein. The use of drones or camera drones in these areas is prohibited.
 - Drones can not be flown over or near airports or in areas where aircraft are operating
 - Drones should not be flown over people or large crowds
 - Respect people's privacy; flying low over villages/settlements is not acceptable without their permission
 - Drones must only be used during daylight hours and in good weather conditions
- Trip Information

Advanced Passenger Information (API)

There are certain details that we require all guests to provide before they travel. The information is needed mainly for our administrative purposes and can be submitted by each guest via our secure online portal at www.masterliveboards.com/portal.

Standard Forms

As previously stated under '[Fit to Dive](#)', it is a requirement for all divers to complete a medical statement. Guests are also required to complete liability releases and the standard safe diving practices statement before the commencement of their liveaboard itinerary. The forms can be found on our website at www.masterliveboards.com/forms.

To save some time, and to ensure that you have no pre-existing conditions which could affect your diving, you can download the forms from the above link, fill them in, and bring them with you. By completing and signing the forms, you are confirming that you have read, understood, and agree to the conditions outlined in the forms.

Additional Technical Diving Forms

In addition to the standard safe diving practices and medical statement, guests joining a Bikini Atoll itinerary are required to complete the [Technical Diving Liability Release](#) and [Bikini Atoll Liability Release](#). Both releases can also be downloaded from the Liability Waivers page of our website: www.masterliveboards.com/forms

If you are unable (or unwilling) to complete any of the forms as instructed, you accept that you may not be able to take part in certain aspects of the liveboard itinerary which you have booked with us.

Life on Board

The main features of the vessel you have booked can be seen via the Bikini Atoll page of the Master Liveboards website: <https://masterliveboards.com/bikini-atoll/>

Accessibility

Due to the layout of the boat, the vessel is not suitable for wheelchairs and may provide challenges, or be unsuitable for guests with limited mobility. Please contact us for further details if you have any concerns.

Accommodation

Unless otherwise stated, accommodation on board is based on standard occupancy of each specific cabin type. Single occupancy of double/ twin cabins may be available on request and is subject to an 80% supplemental charge.

Cabin Facilities

All cabins are air-conditioned. Towels and shower gel are provided free of charge to all guests. Please be aware that the lower deck cabins (standard twins and standard singles) do not have ensuite bathrooms; The facilities for these cabins are located on the dive deck.

Food and Drink

Meals are provided on a full board basis including breakfast, lunch and dinner served buffet style in the indoor dining area. We offer a choice of International and locally influenced cuisine and can cater to special dietary requirements with advance notice. A complimentary range of carbonated soft drinks, fruit juices and teas are available at all times as well as instant and fresh brewed coffee, snacks and fresh fruit. There is also a selection of beer, wine and spirits available for an additional charge.

Special dietary requirements

Should you have any specific dietary needs or allergies please advise your sales consultant at the time of confirming your liveboard trip to ensure we can cater for your needs.

Please note that, while we always do our best to accommodate dietary requests, it is extremely difficult in The Marshall Islands to find low-fat, soya, and many other products that are common elsewhere. Please consider bringing some of your own foods if the lack thereof may constitute a health risk or seriously compromise your enjoyment of your holiday.

Clothing and Footwear

Dress on board is very casual and most guests feel comfortable in little more than swimwear, shorts and t-shirts. A sweater is advised for cooler nights, particularly after extended dive times. We kindly request guests respect the wishes of others by wearing appropriate clothing for meal times. Most guests prefer to go barefoot on board the vessel; however, land visits may require sturdy sandals or cross-trainers.

The boat is equipped with laundry facilities and our housekeeper is happy to launder your clothes during the trip for a nominal fee of 1.00 USD per item, irrespective of size/ weight.

Electricity

Power throughout Pacific Master is 220V / 50hz, using Australian-style 3-prong outlets. We advise bringing a plug adapter and a multi-socket power bar if you have many things to charge and just one Australian plug adapter. If your electrical items are not compatible with 220 V, please bring a voltage adapter with you to avoid equipment damage and ensure it charges correctly.

Staying Connected

There is very limited general internet access throughout The Marshall Islands, and no mobile roaming data available at all.

Pacific Master is equipped with a Starlink satellite system enabling us to offer unlimited wi-fi Internet access on board. There is a fixed charge of 85 USD per person for guests who wish to remain connected with the outside world while they are on the boat. The service is subject to availability and can not be pre-booked or paid for in advance.

There is satellite phone communication on board which can be used in the event of an emergency but will be charged for incoming and outgoing calls at a rate of \$4 per minute (or part thereof).

Underwater Photography and Videography

The vessel offers specialised features for underwater photographers and videographers which include a dedicated charging table, spacious indoor and outdoor workstations for the preparation and maintenance of cameras, individual drawers for storing peripheral and other items and large rinsing tanks with frequently changed fresh water.

Our crew are thoroughly briefed on the handling of delicate camera equipment and will offer to assist you when entering or exiting the water. However, each diver bears the sole responsibility to look after and care for their own camera equipment and fully assumes the risk of any loss or damage to such equipment.

Smoking

Smoking and vaping on board are only permitted in designated outdoor areas.

Environmental considerations

Waste disposal in The Republic of the Marshall Islands is a constant challenge, with traditional disposal methods being neither ideal nor environmentally acceptable. Although the Marshall Islands Government has introduced a management strategy, the current challenges, which include a lack of recycling facilities, remain until the project is complete. We therefore kindly ask our guests to consider the following to help with our mission to reduce our environmental impact.

Batteries

If your equipment requires a unique battery size or is likely to need a lot of replacements during your trip, please bring extras with you and take the spent ones home to be recycled or disposed of properly. Alternatively, ***consider using rechargeable batteries*** as there are plenty of sockets to plug in a charger on board.

Water Bottles

We are dedicated to becoming single-use plastic-free and have already gone a long way towards achieving that goal. Plastic straws and stirrers have already been banned and we have removed single-use plastic bottles from all of our vessels. If you own a sports bottle, we simply ask that you bring it with you, or you can purchase one on board. Alternatively, we have plenty of cups on board that you can use to ensure you remain well-hydrated.

Plastic bags and wrappers

We do not provide plastic bags for purchases made on board, although reusable canvas bags are available for sale. Please help us minimise plastic waste by removing plastic wrappers and packaging from items before travelling. If you bring plastic bags with you, please reuse them, and take them home.

Toiletries

We kindly ask that guests consider the type of products they are bringing with them. Where possible, only bring environmentally friendly toiletries for use on board and take partially or unused products home.

If you are bringing cotton buds (Q-tips) with you, please avoid the types that have plastic stems. There are many products available which use unbleached paper or bamboo instead of plastic and are therefore much more environmentally friendly.

Payments on Board

Marine and Port Fees

Marine and Port fees are dependent on the itinerary duration and will be added to your invoice to be paid on board before disembarkation.

Please refer to your booking and itinerary details for the amount applicable to your trip.

The full amount of the Marine and Port Fees is paid directly to the Bikini Council and cannot be fully or partially reimbursed if a trip is cut short for any reason.

We strongly recommend guests have insurance which covers losses due to trip curtailment.

Onboard extras and payments

Additional charges for gases and Sofnolime*, as well as equipment and cylinders that have not been paid for in advance, and other items such as laundry, alcoholic drinks and Master Liveboards merchandise, can be paid on board in cash or by credit card.

*Sofnolime is charged per 20kg tub and can not be paid for in advance, although it MUST be pre-ordered. No price reduction or buy-back will be offered for opened or partially used tubs.

All prices are given in USD, but can also be paid in Euro, GBP, and AUD calculated using the applicable exchange rate on the last day of your liveaboard. We can also accept Mastercard and Visa credit card payments onboard for which there is a 3% surcharge.

Please note that **we are unable to charge gratuities to credit or debit cards.**

Guests are advised to bring from 500–900 USD cash in addition to the applicable marine and and port fees to cover extras that have not been paid in advance in case of card payment issues, as well as any gratuities you may wish to leave.

Tipping

We believe that tipping is a matter of personal choice. Should you feel that your crew has made your holiday extra special then a tip is always appreciated; an envelope will be provided for your convenience by your cruise director and all gratuities are divided equally amongst all the crew, including the captain and dive guides.

If you are unsure how much to tip, we suggest 10% of the liveaboard price; Please note that ***tips can only be accepted in cash.***

Safety on Board

Emergency Management

All of our crew members undergo rigorous training in emergency management procedures. A thorough boat safety briefing will be provided, in English, by your Cruise Director at the start of your trip during which all guests will be requested to participate in a life jacket drill. If you do not understand, or speak English, please let us know.

Further practice scenarios may be performed during your cruise to assist our crew in keeping their skills sharp.

Emergency Equipment & First Aid

Pacific Master is equipped with numerous safety features including fire detection and suppression systems, automated life rafts, EPIRB, satellite communication and emergency pumps.

There is a fully stocked medical first aid kit for treating minor injuries and ailments as well as a full complement of medical-grade oxygen which can be administered through DAN kits or unit-specific attachments in the event of suspected DCI incidents. You will also find an Automated External Defibrillator (AED) on board which has been proven to greatly increase the survival rate in the eventuality of cardiac fibrillation.

Our dive teams are all qualified emergency responders. Should you feel unwell at any point during your cruise, please seek the advice of your cruise director who will be able to assist you.

Extending your holiday

Travelling to and from the Marshall Islands can be made exceptionally easy when you book with Master Liveaboards. We offer a range of hotels, transfers and excursions that can be arranged for before or after your diving holiday.

Optional Bikini Atoll package

To extend your Master Liveaboards holiday experience, for an additional cost, we can organise transfers to and from the airport in Hawaii and book the hotel of your choice in Honolulu for your first and last night before and after your Marshall Islands flights (Prices depend on hotel choice). Please contact our reservations team for more information and quotes.

FAQs

If there are any questions that have not been answered, please visit our website at <https://masterliveaboards.com/faq/bikini-atoll/> or email us at dive@masterliveaboards.com and our team will be happy to assist you.

What to Bring

Our blog, [Packing for a Scuba Diving Liveboard](#) provides useful tips on what to pack. The following is a checklist of essential items that you should ensure you bring with you for your liveboard diving holiday. A complete packing checklist can be downloaded [here](#)

Passport

6 month validity & at least 2 empty pages for visa stickers and stamps

Travel Documents

Flight tickets - International & Domestic; hotel booking; excursions
Printed copy of the Master Liveboards Sponsor Letter

Cash & Credit Card for emergencies

Recommended amount (additional to park & port fees): 250 - 500 USD
Airport Departure Tax in local currency

Diving Certification & Logbook

Including Nitrox Card if certified & intending to use Nitrox

Travel and Diving Insurance Documents

To include emergency medical evacuation

Essential Diving Items

Dive computer with full battery

Toiletries & Medications

Including sunscreen & insect repellent
Inform booking team of medical conditions

Essential Clothing Items

Swimwear, hat and lightweight jacket

Guests are strongly advised to carry essential items in hand luggage in case of lost or delayed luggage through International or Domestic Flights.
