While we wish to show you the very best diving possible, a number of factors determine which route the yacht takes and which dive sites we are able to visit. Weather, tides, currents and how many other dive vessels are at a particular site, influence the Cruise Director's and Captain's decision of which route the boat takes and which sites are selected for diving.

The safety of all on board is paramount and we always do our best in offering diving at alternate locations should we be unable to visit those sites listed below.

Following is a sample of dive sites which we may visit during your time aboard.

Guests are welcome to suggest preferred dive sites to the Cruise Director. He/she will be happy to accommodate guests' wishes, providing it is possible and the schedule allows for it.

St. Johns Reef

Located on the Tropic of Cancer, this chain of reefs boasts stunning dive sites, most of which are very close to each other allowing you to move quickly and easily from one place to another. This adds a lot of variety to your dives; drop-offs, tunnels and stunning hard-coral formations. One of these dives (St. Johns Caves or Umm Kharalim) is truly unique and is a photographer's heaven with rays of light filtering through into the beautiful tunnels. The reef formation is not the only thing that will stun you at St. Johns; the marine life and colours of the soft corals are some of the best in the Red Sea. With any luck, dolphins or sharks will join you on your dives and St. Johns will forever have a place in your heart.

Fury Shoal

This large cluster of reefs offers unforgettable and easy dives. From the northern site of Small Abu Galawa to its southernmost site of Sataya, Fury Shoal can prove to be surprising and diverse.

Each dive site has its particularity: from dolphins to stunning hard coral formations and not forgetting the two little wrecks "Tug Boat" and the "Yacht".

Elphinstone Reef

A Red Sea legend; a finger-shaped reef, with north and south plateaus covered in hard and soft corals, unpredictable and exciting this truly is an awesome reef where hammerhead sharks are regularly spotted in the summer and oceanic whitetip sharks often congregate in large numbers during late autumn.
