

Ecuador & The Galapagos Islands – COVID Test Package

2 Nights hotel stay, COVID Test arranged and transfers included.

Let us make the arrangements so you don't have to!

The new rules state that all guests are required to enter Ecuador with a negative Covid test taken no more than 10 days prior to arrival and subsequently are required to take another Covid test before entering the Galapagos Islands. To allow for this testing, guests will be required to spend a minimum of 2 nights on the mainland before travelling to the Islands.

However, if the first Covid test returns a negative result within 96 hours of arrival to the islands, guests are not required to have the second test whilst in mainland Ecuador.

In order to help facilitate the new entry rules, we have been working with our team in Ecuador to provide a COVID test and accommodation package prior to the liveaboard holiday. We are pleased to be able to offer this as a pre-package deal which includes; a 2-night stay in a hotel, COVID test to be booked and arranged on your behalf, as well as the transfers to the airport.

Please speak to your consultant for more information and details on how to book with us.
