

Raja Ampat, Indonesia

7 Nights and 10 Nights Itinerary

- **Embarkation:** Sorong Marina, West Papua between midday and 12:30 p.m.
- **Disembarkation:** Sorong Marina, West Papua no later than 10:00 a.m.

Flights & Transfers

- **Domestic Arrival & Departure:** Domine Eduard Osok (Sorong) Airport (SOQ)

Flights to and from Sorong are not included in the liveboard price.

Transfers between Sorong Airport or local hotels and the marina are provided free of charge on the day of embarkation and disembarkation only.

Guests staying in Sorong before their liveboard will be picked up from their hotel at a time that will be confirmed by our local operations team the night before embarkation.

Guests arriving in Sorong on embarkation day will be met at Sorong Airport by Master Liveboards staff who will assist with your luggage and onward transfer to the marina. For those arriving before 12.00, there is a restaurant at the marina where you can relax before embarkation, or take a short walk into town to explore the shopping facilities.

Transfer between Sorong Airport and the marina takes approximately 15-20 minutes.

International Arrival & Departure

We recommend booking your international flights into and out of Jakarta International Airport (CGK) for the easiest domestic connections to Sorong. We advise you to spend at least one day in Jakarta on either side of your liveboard dates to ensure you are on time for your flight connections and to allow for any possible changes to flight schedules.

Our reservations team can help to arrange hotel accommodations, airport transfers and domestic flight connections between your international arrival and departure and the liveboard embarkation and disembarkation points.

Domestic Flights

Check-in time for domestic flights in Indonesia is usually 2 hours before departure. Please bear this and transfer times in mind when booking disembarkation day flights.

There are several direct flights per day operating between Jakarta and Sorong; Travelling between Bali and Sorong usually requires a flight change in either Makassar or Jakarta.

NOTE: Direct flights between Bali and Sorong only operate on Friday and Sunday.

As domestic flights in Indonesia are often subject to delays, schedule changes and cancellations, which can result in missed connections and arriving after the designated embarkation time, or day, we strongly recommend making arrangements to arrive in Sorong the day before embarkation to allow for such eventualities.

If your delayed arrival is after the vessel has departed, you may be charged for the cost of arranging a speedboat transfer or for additional fuel required for Indo Master to return to port.

Embarkation Day Arrival: Guests intending to fly into Sorong on embarkation day should arrange flights to arrive no later than **12:00 p.m. (midday)**.

Departure: We respectfully ask guests not to book flights departing earlier than 08:30 a.m. from Sorong as disembarkation needs to be 2 and a half hours before the flight departure time.

If your flight out of Sorong departs later than 10.30 a.m. we will transfer you to a cosy local restaurant near the airport where you can wait for your flight.

Diving Information

It is a mandatory requirement for all divers to have diving-specific insurance (e.g. [DiveAssure](#), [DAN](#), etc.) which covers all scuba diving activities, emergency evacuation and recompression chamber costs. Diving insurance will only cover accidents within the depth limit dictated by your certification level so you are required to remain well within those at all times.

The use of a dive computer, a 6 minute safety stop and an ascent rate of no more than 9 metres (30 ft) per minute are mandatory on all dives.

Generally, most of the diving in Raja Ampat is suitable for all certification levels. However, some dives can be challenging for entry-level or inexperienced divers due to depths and varying currents.

Minimum dive certification and experience

Divers joining a Raja Ampat itinerary should have **PADI Advanced Open Water* or equivalent certification**, with a **mandatory minimum of 50 logged dives and experience diving in strong currents**.

*Open Water Divers must have a minimum of 60 logged dives and should also have deep (30 metres) dive training. Deep Adventure Dive can be completed onboard for those who have not already done it.

Guests who do not fulfil the recommended minimum requirements, or who the crew feel have insufficient experience in certain conditions, may be denied participation in some or all dives during the liveboard.

Diving Emergencies

There is a hyperbaric chamber in Waisai but it is not permanently staffed and can not be relied upon to be available. The nearest permanently manned recompression chamber is in Manado (Sulawesi); others are located in Bali, Makassar and Jakarta. In the event of a suspected DCI incident, depending on the boat's location, transfer from Indo Master to whichever chamber is available is likely to require a private speedboat or emergency air evacuation.

It is your responsibility to ensure that your insurance will fully cover and reimburse all evacuation costs as well as recompression chamber and hospital treatment.

Water Temperature and Exposure Suits

The warm tropical waters of Raja Ampat are pleasant throughout the year with little variation in temperatures which average around 27° to 29°C (80° to 84°F).

For most divers, a 3mm wetsuit will suffice while some are comfortable diving in swimwear and a hooded vest or rashguard. However, those prone to feeling cold after prolonged or multiple dives may prefer a 5mm wetsuit, or to use additional layers.

Itinerary Details

Participation in this liveboard itinerary is subject to acceptance of our Terms & Conditions as outlined here: www.masterliveboards.com/terms-conditions.

Marine Park & Port Fees: (payable on board only)

- 7 nights: 170 USD* per person
- 10 nights: 200 USD* per person

**Marine park fees are subject to change without notice.* The applicable amount at the time of departure will be added to your onboard extras to be paid before disembarkation.

Marine Park and Port fees cover the cost of Raja Ampat entry permits* and other local fees and taxes for the areas we visit.

**Raja Ampat entry cards are valid for 1 year (12 months) from the date of purchase.* If you already have a card that will be valid for the entire duration of your itinerary, please send us a photocopy of it no less than 4 days before the start of your liveboard to avoid being charged for an additional one. You will also need to bring the card with you for verification on board.

Number of scheduled dives:

- 7 nights: up to 22
- 10 nights: up to 32

While we endeavour to ensure the number of scheduled dives is fulfilled, these are indicative only and not guaranteed. Various factors can affect the vessel's ability to reach or remain at specific locations and may impact the number of dives possible.

Included land tours

There are several potential shore excursions which may be included on Raja Ampat itineraries; Generally, there will be 2 land visits offered on each itinerary; one is the Penemu Viewpoint which is always offered and popular, the other may be one of the following, or an alternative, dependent on itinerary, environmental conditions and logistics.

- Arborek (village visit)
- Alyui (Pearl Farm)
- Sawinggrai (Bird Spotting - additional charges apply)

10-night itineraries only

- Tomolol Caves (Misool)
- Lenmakana jellyfish lake (Misool)
- Daram Beach (Misool)

The following is an example of the day-to-day itinerary.

Day 1: Embarkation from 12:00-12:30 followed by introductions, boat and safety briefings and dinner. There is no diving scheduled on this day.

All safety and dive briefings are conducted in English. If you or any of your group do not speak or fully understand English please let us know in advance.

Day 2: Breakfast followed by a check dive, and up to 3 subsequent dives, as outlined below.

Days 3-6 (7 nights) / Days 3-9 (10 nights)

Your Cruise Manager will schedule up to 4 dives per day; 3 day dives and either a sunset or a night dive. A typical diving day is scheduled as follows:

- Light Breakfast followed by a briefing & Dive 1
- Full Breakfast, relaxation followed by briefing & Dive 2
- Lunch, relaxation followed by briefing & Dive 3
- Snack
- Briefing for Sunset or Night dive
- Dinner

Day before disembarkation: For your last full day on board, we usually schedule 2 morning dives* before the boat cruises back to Sorong, where it will remain at anchor in the harbour overnight.

Disembarkation day: Breakfast on board followed by disembarkation and transfer to Sorong Airport not later than 10:00.

*We kindly ask guests to check their flight times to ensure they leave 24 hours between their final dive and their departure from Sorong.

Following is a sample of some of the dive sites we may visit during your time aboard Indo Master. While we wish to show you the best diving possible, various factors determine which route the boat follows, and which dive sites we visit. *Weather, tides, currents, sea conditions and how many other vessels are at a particular location all play a part in the Cruise Manager's decision of which sites are chosen to dive at any particular time.*

The safety of our guests is paramount and we always do our best to offer diving at alternative locations, should we be unable to visit any of the sites listed below.

Mansuar Island & the Dampier Strait

Fast drift dives and big fish schools characterise the sites surrounding Mansuar and the Dampier Strait. Numerous dive sites are clustered together providing a variety of "Big Fish" dives with currents and more relaxed dives where smaller creatures can be found and photographed. Your dive team will check currents and choose sites based on the optimum conditions each day.

Manta Sandy

The two large bommies situated in the middle of a sandy bottom at just 18 metres (60ft) is a world-renowned cleaning station which attracts many reef manta rays of a variety of shades and sizes, including all-black mantas, distinctive to Raja Ampat. Divers can simply rest on the bottom and watch the show.

The reef itself has many smaller creatures with dragonets and various pipefishes as well as Bumphead parrotfish and Black-tip reef sharks. Therefore, if the mantas are not performing, there is still plenty to look at and discover.

Cape Kri

One of the best-known sites in the Dampier Strait, the variety of reef fish is astounding. A world record setter with 374 species of fish seen during one dive, Scribbled filefish, Harlequin sweetlips, Bumphead parrotfish, Pinnate batfish, hawkfish and Napoleon wrasse are all commonly seen. In the blue, myriad Bignose unicornfish and Bluestreak fusiliers are closely watched by giant trevallies and dogtooth tuna, whilst black tip reef sharks, pickhandle barracuda, turtles and pipefish are all regularly spotted as well.

Blue Magic

A long finger-shaped reef sloping down at the points from 8 metres to 30 metres (26ft - 98ft) with hard and soft corals, sea fans and black coral bushes; schools of jacks and barracuda hover close to the reef while grey reef sharks cruise in the blue and mantas sweep through the cleaning stations. For the keen-eyed, wobbegong sharks and pontohi pygmy seahorses add to the appeal and wonders of this magical dive site.

Sardine Reef

Swarms of fusiliers, snappers and sweetlips, schools of bumphead parrotfish and banner fish, barracuda and trevally that come to feast on the nutrients in the surrounding water all make this site a very fishy dive. Rock-mover wrasse, dragonets and jaw fish are amongst the smaller fish species seen here whilst white-tip and black-tip reef sharks can also be spotted.

Mioskon

This is a superb dive spot where the sharp-eyed can find pygmy seahorses, flatworms, nudibranchs, scorpion fish and the occasional hunting shark. We can also see trevally hunting fusiliers, black-tip reef sharks and giant moray eels.

Mike's Point

Eagles can usually be spotted resting on the treetops as we approach the tiny island known as Mike's Points. Currents can be unpredictable and challenging so we only dive here when the conditions are right. It is a superb site comprising varied topography with one side full of overhangs and crevices whilst the other has "steps" dropping down to the deep with a field of whip corals adorning the slope. When there is no current, it can be circumnavigated in one dive seeing sweetlips, batfish, jacks, Spanish mackerel, grey reef sharks and wobbegongs.

Friwinbonda

Lionfish can be seen hunting glassfish schools that hover around the black coral bushes, tiny pipefish and transparent skeleton shrimp are among the other interesting critters at this great night dive spot.

Gam & Yangeffo Islands

The islands surrounding Waigeo, the third main island of the Four Kings, provide a range of dive sites for us to choose from including

Melissa's Garden

This site is home to some of the best hard coral gardens in Raja Ampat. Featuring a shallow flat reef with beautiful blue-tipped staghorn corals inhabited by myriads of damselfish, trevally, black tip reef sharks and wobbegong sharks, along with orangutan crabs and spiny lobsters are common sightings here.

Mayhem

This dive spot is notorious for its strong currents, making for an exhilarating dive with lots of action. It is great for larger fish sightings including Barracuda, Mackerel, Blue-fin trevally, Tuna, Napoleon wrasse and Bumphead parrotfish, as well as eagle rays and wobbegong sharks.

Citrus Ridge

A stunning reef named after the carpet-like orange, pink, yellow and green soft corals that cover the entire area. Gorgonian fans shelter pygmy seahorses, jawfish bob out of their ground holes, wobbegong sharks rest lazily amongst table corals and harlequin sweetlips can be found tucked into the many bommies that are dotted over the reef. The up-current side offers sensational pelagic encounters such as roaming grey and blacktip reef sharks, schooling jacks and a vortex of blackfin barracuda.

Batanta Island

Batanta Island, one of the Four Kings, offers something truly exceptional. Known for its muck diving, there is nothing that cannot be found here along the dark sand slopes. Mimic octopus, wunderpus, snake eels, dragonets, cuttlefish, flasher wrasse, solar-powered nudibranchs and ornate and robust ghost pipefish to name just a few. Depending on the weather and tidal conditions we will choose from sites including **Algae Patch I**, **Algae Patch II** and **Happy Ending!**

Misool Islands (10 nights itinerary only)

Due to the travel distances involved, 7-night itineraries do not usually visit Misool unless there are exceptional circumstances. If Misool is visited on 7 night trips, some of the areas above will not be dived.

Collectively called 'The Misool Marine Reserve', there are numerous small islands surrounding Misool Island, the second of the Four Kings, including Daram, Farondi, Boo, Wayilbatan, Kalig and Warakaraket to name just a few. Each offers some of the most dramatic underwater scenery of the region, from steep walls with huge gorgonian fans to gentler slopes with abundant hard and soft corals. Diving on some of the sites listed depends on sea and weather conditions.

Candy Store

Situated in the Daram Archipelago of the Misool region, we see colourful soft corals and yellow sponges, sea whips and black coral which hide creatures, such as ghost pipefish and coral shrimps. Schools of batfish, fusiliers, snapper, butterfly fish and bumphead parrotfish can all be seen here, as well as barramundi and Napoleon wrasse. There is so much to see, you truly will feel like a kid in a candy store.

Andiamo

A diverse, exposed, two-island reef with walls, overhangs, pinnacles, ridges and a shallow plateau. With a wide variety of marine life, it is no wonder Andiamo is one of the most famous dive sites in Misool. Thick schools of sardines and fusiliers cruise over the colourful soft corals where we often find wobbegong and epaulette sharks resting on the sand. Yellowtail and chevron barracuda form schools along the reef whilst reef octopus and numerous nudibranchs can be found.

Boo Windows

Comprised of two rocks that stick up from the eastern edge of Boo Island with a saddle formed between them, this dive site is a coral garden paradise. Prone to currents, diving can be quite thrilling as it attracts trevally, Spanish mackerel and dog tooth tuna, amongst others. Near the surface, the tides and water have eroded window-like holes (hence the name) in the rocks creating swim-throughs and shallow rocky formations, blanketed by orange soft corals that make for great photography opportunities. Pickhandle barracuda, snapper, grouper, Napoleon wrasse, turtles, batfish and rabbitfish are often seen in the waters surrounding the islands.

Whale Rock

This small island in the Fiabacet chain derives its name from its distinctive shape which looks like a whale when viewed from the south. Due to its exposed location, most dives on this rocky islet are drifts along a gently sloping reef from 6m - 20m (20ft - 66ft) covered with corals and sponges. It's a great spot to hunt for interesting critters including tiger cowries, fire gobies, hawkfish and mushroom coral shrimp.

Nudi Rock

A nudibranch-shaped island and an iconic dive site, part of a 1.3km (0.8 mile) ridge with walls, pinnacles and sandy plateaus. Marine species vary from macro to large pelagics which can all be seen at this stunning site. Blacktips, whitetips, grey reef sharks, and schooling blackfin barracuda can be spotted cruising by, whilst hiding amongst the corals are crocodile fish, nudibranchs, porcelain crabs, and the elusive soft coral pipefishes.

Kalig Potato Point

Also in the Fiabacet area, this is a superb night diving location and host to a wide variety of nudibranch species including nembrotha, chromodoris, hypselodoris, tambja and joruna.

Gorgonian Passage

Also known as Neptune's Fans Sea, this passage is situated in the channel between Wayilbatan and Wayil islands. It has huge sea fans along the walls in which pygmy seahorses can be found including Bargibanti and Denise's. Other attractions are the countless variety of sweetlips and smaller marine creatures, such as peacock mantis shrimp and juvenile convict fish on the shallow sandy bottom.

Barracuda Rock

This is another very fishy site with schools of Big-Eye Trevally and hundreds of Yellowtail and Chevron Barracudas. An overhang on the southeast side is a good place to find Sweetlips, moray eels and lionfish during the day. With its shallow reef top, it is also one of our favourite night diving spots at Wayilbatan with all manner of crustaceans hiding amongst the corals from decorator crabs and arrow crabs to Durban dancing shrimp and pink squat lobster, octopus, yellow margined morays and pygmy seahorses all seen here.

Dunia Kecil

Also known as Small World, this tiny island with its steep walls, overhangs, slopes and beautiful shallow reef top is a delight of colours and fish variety. It is another superb site to spot pygmy seahorses, and 'ladybug' amphipods that are more commonly seen in Komodo National Park. Hawksbill turtles, schools of batfish, crocodile flathead, barramundi cod and juvenile cuttlefish are amongst the other marine creatures that can all be found here.

Should you have any questions concerning the dive sites or whether this itinerary is suitable for your experience level, please contact our reservations team dive@masterliveboards.com who will be pleased to assist and advise you.
