

Solomons - Florida & Russell Islands

7 Nights Itinerary

- Embarkation: Coral Sea Resort, Honiara at 18:00
- Disembarkation: Coral Sea Resort, Honiara at 09:00

Transfers between Honiara airport or local hotels and Coral Sea Resort on embarkation and disembarkation days are provided free of charge.

Guests arriving on morning flights or departing on afternoon flights are welcome to relax at Coral Sea Resort or can leave their luggage at the resort if they wish to venture into town.

Marine Kastom Fees & local taxes: 175 USD per person

Kastom fees will be added to your invoice to be paid on board before disembarkation.

Minimum dive certification and experience:

Diving around the Solomon Islands is generally suitable for all experience levels, although some sites can be challenging and unsuitable for entry-level divers. We recommend guests have **PADI Advanced Open Water* certification, or equivalent, with 40 logged dives.**

*Advanced Open Water certification can be completed on board. Please ask our team for details. You will be asked to show your certification card(s) and recent log book(s) upon boarding the vessel to prove your dive qualifications and experience.

Any guests who do not have the recommended certification and experience, or who our crew feel have insufficient experience or skills in certain conditions, may be denied participation in some or all dives.

It is a mandatory requirement for all divers to have insurance which covers scuba diving activities, including emergency evacuation and recompression chamber costs.

Participation in this liveaboard itinerary is subject to acceptance of our Terms & Conditions as outlined here: www.masterliveaboards.com/terms-conditions.

Itinerary Details

Number of scheduled dives: Up to 22

Whilst we attempt to ensure the number of dives we have scheduled is fulfilled, bad weather can hinder the boat's ability to reach a specified dive site in good time.

Guests are responsible for their own dive profiles and for obtaining suitable dive insurance to cover all diving activities. We respectfully request our divers to stay within the bounds of their training, follow dive computer guidelines and make decompression stops where necessary.

The following is an example of the day-to-day itinerary.

Safety and dive briefings are conducted in English. If you, or any of your group, do not speak or understand English, please contact us.

Day 1: Embarkation from Coral Sea Resort at 18:00, followed by introductions, boat and safety briefings and dinner. There is no diving on embarkation day.

Days 2-6: Your Cruise Director will schedule up to 4 dives per day; 3 day dives and either a sunset or a night dive. On certain days, village visits* or land-based excursions may be offered.

A typical diving day is scheduled as follows:

- Light Breakfast followed by a briefing & Dive 1
- Full Breakfast, relaxation followed by briefing & Dive 2
- Lunch, relaxation followed by briefing & Dive 3
- Relaxation
- Land Tour* or Late Afternoon Dive**
- Cocktails & Dinner
- Cruise overnight to the next location

*During village visits the children come out to play and love our gifts of school supplies. Solomons Master is a member of Pack for a Purpose supporting local communities and an advocate of the Solomon Islands Literacy League project. Find out how you can help here: <http://packforapurpose.org/destinations/oceania/solomon-islands/>

**Night Dive may be offered on selected days

Day 7: For your last full day on board, we schedule 2 morning dives* before the boat commences the cruise back to Honiara.

Day 8: Following breakfast on board, disembarkation is scheduled for 09:00.

*We kindly request that guests check their flight departure times to ensure that they leave a minimum of 24 hours between their final dive and their flight home.

While we wish to show you the very best diving possible, a number of factors can determine which sites we visit. Weather, tides, currents and many other considerations influence the Cruise Director's decision of which route the boat takes and which sites are selected for diving. Specific dive sites are always chosen with conditions, visibility and guest safety in mind.

We customise our itinerary each week to ensure you experience the best visibility, water conditions, wildlife and dive sites possible. Following is a sample of dive sites that we may visit during your liveaboard.

Russell Islands

Hai Island - [White Beach](#)

This location was home to a major American supply base during WWII. At the end of the war, before the U.S. Military departed, they dumped much of the machinery and equipment into the sea making this a treasure hunt dive where you can find trucks, jeeps, discarded ammunition and other relics left by those who were stationed there. The artificial reef created by these artefacts also provides a haven for a variety of marine life including macro critters, ornate ghost pipefish and crocodile fish.

Hai Island - Rainbow Reef

This reef is a large saddle-shaped seamount covered with fans, soft corals, and sponges. It's an open-ocean site which offers a gorgeous vantage from which to spot sharks, mobula rays, and schooling barracuda. The water clarity is normally excellent and there is so much going on, it's hard to know where to look. With a minimum depth of 17 metres (55 ft), your dive is sure to be over long before you're ready to ascend.

Karamulon Point

Normally, patrolling white and blacktip reef sharks greet us here when they start their day cruising along the wall. White-spotted eagle rays can also be found heading out in deep water.

Leru Island - Leru Cut

One of the most iconic sites in the Solomon Islands; this 100 metre chasm cuts deep into Leru Island and offers amazing photography opportunities as the light bounces off the walls above and below the surface. Imagine yourself surfacing in the jungle, listening to the frogs call, before you descend into this one-of-a-kind cavern.

Mane Island - Mirror Pond

Outside of the cut is a fabulous wall teeming with fish life. Nearby is **Mane Island** and the famous **Mirror Pond** with its many swim-throughs and **Bat Cave** with its resident bat colony. Descend into this cavern and surface in the mangrove forest. Or if you prefer, spend your time cruising along a beautiful wall covered in fans and coral hunting for pygmy seahorse

Florida Islands

The Florida Islands are known for some of the most amazing WWII history dives including several seaplanes as well as stunning reefs.

Tulagi

The Mavis is a 4-engine Japanese Mavis Seaplane which sits upright at approximately 30 metres after being sunk in WWII. Lionfish and glassfish frequent the wreck along with a wide variety of pipefish. Divers need to watch their bottom time to avoid deco and also need to maintain good buoyancy as the bottom is soft and easily stirred up by careless fins. The wreck is reasonably intact except for the starboard wing which was lost (probably from bombing).

Tulagi Island - Twin Tunnels

Twin Tunnels can be found on a seamount that rises from the seabed at a few hundred metres to a large plateau at 15 metres. A pair of tunnels that drop vertically from the top of the plateau into a horizontal cave at around 34 metres offer divers the opportunity to explore inside the reef. The cave has a large mouth which opens onto a dramatic wall which is current-facing. Schools of pelagic fish can be found feeding along the wall. At least 8 varieties of anemonefish in hundreds of anemone homes can be found on the top of the plateau.

Nggela Sule Island - Tanavula Point

This beautiful, steeply sloping reef and wall are covered with an innumerable variety of soft and hard corals and sea fans where the attentive diver can spot hundreds of nudibranchs and countless other critters. Bumphead parrotfish and a variety of rays are commonly spotted amid the diversity of coral and other marine life.

Mbokonimbeti Island- Maravagi

This quaint village is home to approximately 100 local islanders. The bay in front of the village is the Solomons' answer to muck diving with coral bommies, patches of rubble and white-sand muck, boat wreckage, and a large bed of seagrass, all of which are inhabited by tiny creatures. This heavy-hitting macro dive delivers nudibranchs, sapsucker sea slugs, cuttlefish, seahorses, tiny crabs and shrimp and even such rarities as Pugnose pipefish. All sorts of anemones can be found in this area as well, including ones inhabited by true percula clownfish.

If the weather and tidal conditions are right, nearby **Devil's Highway** offers the chance for manta ray sightings while just around the corner, **Baby Cakes** is another good spot for cuttlefish and cruising reef sharks.

Ghavutu Island - Mavis or Catalina

No trip to the Solomons would be complete without at least a glimpse of the devastation created during WWII. Ghavutu Island is home to at least 13 known Japanese Mavis planes and at least one Catalina (American) plane. The nearby wharf was a dumping ground for WWII detritus and has become a muck divers dream where we can find blue ribbon eels, pipefish, a variety of nudibranchs and flatworms now hiding among the rubble.
